

# Driving Financial Impact and Digital Transformation with Simplified Approvals

## The Problem

Finance is often the circulatory system of your organization – not only responsible for allocating capital and paying bills, but finance also ensure every department has the resources required to properly function, while also maintaining the overall health, stability and reputation of the enterprise.

Finance groups strive for thorough fiscal management, yet need to remain agile to help grow the business. Each decision undertaken by finance, also known as a **control point** or an **approval**, must either be approved, rejected, or sent back to the requestor for further information. The complex array of business software that generates these approval requests often serve to unnecessarily prolong decision cycles. Managers who perform approvals face four hurdles to timely approval execution:

- **Application proliferation:** Even the most basic tasks require multiple systems with their own individual logins and interfaces. Each business system can add exponential frustration and needless delay.
- **Inadequate notifications:** When new technologies and systems are adopted, users often find it difficult to be proactive about tasks. Yet not every system knows when, where, and how to prompt a response.
- **Cumbersome workflows:** Multiple layers of approvals, from executive buy-in to cross-functional sign-off, can be time-consuming and frustrating for all involved.
- **Lost requests:** Inboxes, whether e-mail or paper-based, fill up faster and faster each day, and quickly become more of a nuisance than an organizational tool.

**90% of finance leaders report challenges with the length of their decision cycles, adding that they see direct financial impact - including late payment penalties, non-compliance costs, loss of preferred-vendor pricing and more.**

- Dimensional Research

## FINANCIAL BUSINESS IMPACT FROM SLOW APPROVALS:

Lost or delayed sales activity

Unapproved and untracked purchases

Loss of preferred-vendor pricing

Lost discounts and negotiated savings

Late payment penalties

Delivery delays

Unplanned costs

Financial Reporting audit risk

## The Solution

Capriza delivers real business and financial impact. Simplified approvals speed up a company's decision-making by up to 70%. It's one approvals interface for any source system, without having to fumble with multiple logins and stand-alone apps. Now, important business processes that occur in multiple systems can be centralized around approvals.

## Key Features

- Already **Connected to Your Existing Applications**: Capriza already has integrations and templates for the most popular applications and approvals, such as ServiceNow, Oracle, SAP, Ariba, Concur and Workday.
- **Available where your employees are**: on mobile, desktop, in Slack and in Microsoft Teams.
- **Ease of use**: Consumer-grade, intuitive interface that allows managers to easily approve, reject or reassign all of their approval requests - without having to login to multiple systems.

## Business Benefits

### INCREASE OVERALL PRODUCTIVITY

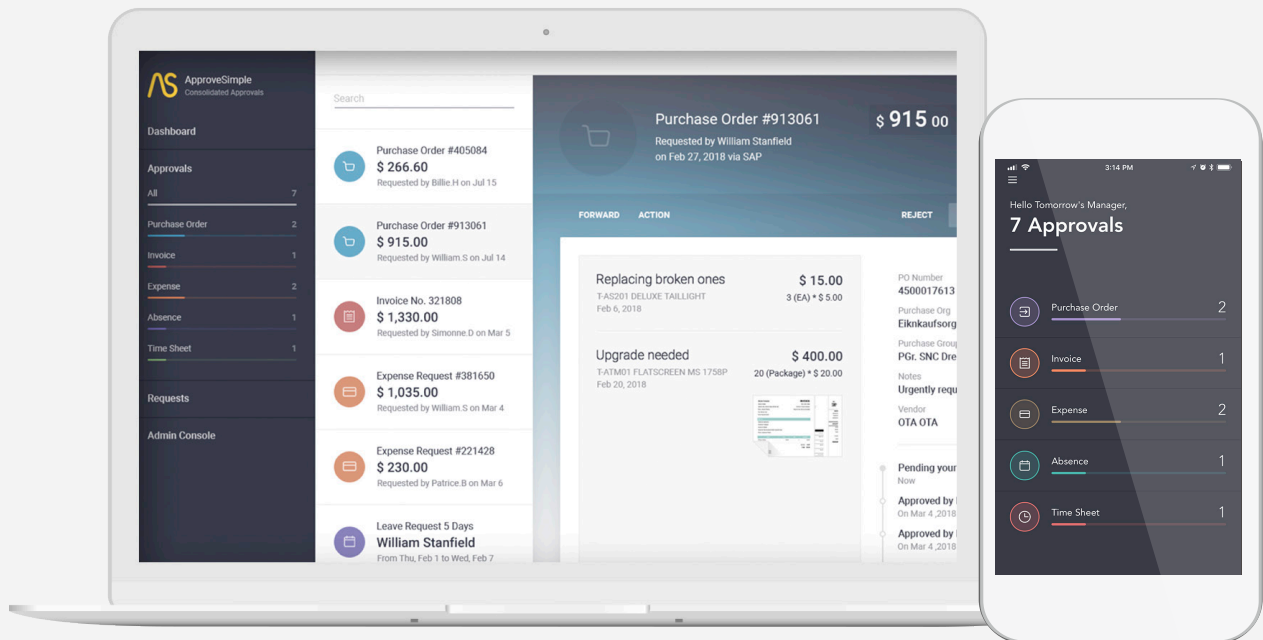

- ✔ Perform approvals anytime, anywhere
- ✔ Faster, more informed, decisions
- ✔ Reduce the time employees are being held up by delayed approvals

### IMPROVE FINANCE EFFICIENCY

- ✔ Eliminate delivery delays
- ✔ Utilize early-pay discounts
- ✔ Make expenditures more transparent

### ACHIEVE IMMEDIATE IMPACT

- ✔ Cost-effective, cloud SaaS solution
- ✔ Quick win in your finance transformation initiatives
- ✔ Fast time-to-market (weeks)

## About Capriza

Capriza is the first platform to elegantly extract and beautifully simplify approvals from your company's core applications. We make cumbersome approvals of all types fast and easy, helping to speed decision-making by up to 70%, while dramatically improving the quality of those decisions. Capriza helps enterprises such as Autodesk, PepsiCo, Harman International and many others reduce costs, remove bottlenecks, save time, improve compliance and increase employee satisfaction.
